

The Depository Trust Company

IMPORTANT

B#: 4630

DATE: May 28, 2003

TO: Participants and Other Users

CATEGORY: Settlement/Underwriting

FROM: Product Management

ATTENTION: Managing Partner/Officer, Operations Manager

SUBJECT: Consolidated Settlement System

Subject to SEC approval, The Depository Trust Company (DTC) and The National Securities Clearing Corporation (NSCC) will introduce a consolidated settlement system. The new consolidated settlement system will provide DTC and NSCC participants with consolidated reporting and a single point of access for all settlement information. The new consolidated settlement system will provide DTC and NSCC participants and their settling banks with a single set of enhanced Participant Terminal System (PTS) functions. Each participant will be able to view its DTC/NSCC settlement activity and will be provided a consolidated netted DTC/NSCC settlement obligation. To provide an opportunity for participants to become familiar with the new combined screens, the consolidated screens will be implemented in parallel with the current DTC and NSCC settlement systems.

Although DTC and NSCC will calculate and display a single consolidated settlement obligation for each participant, the two organizations (DTC and NSCC) will remain separate legal entities and each participant will continue to have a separate settlement obligation to/from DTC and NSCC. The identity of settlement obligations by organization and product code will be maintained and shown separately. NSCC's and DTC's debits and credits will be separately summarized in one consolidated activity statement, and the final NSCC and DTC balances will be netted and/or aggregated to one ultimate balance for each participant.

The consolidated DTC/NSCC settlement system will reduce the redundancies associated with running two separate settlement systems, but will not change each participant's settlement obligation to or from DTC and NSCC, respectively.

Current Process

Currently, DTC and NSCC run separate settlement systems. Throughout the day, each settlement system processes debit and credit transactions generated by participant activities at each organization in its respective product lines. The settlement data is summarized and reported by product category (e.g., CNS, Mutual Funds, Envelope Services, etc., at NSCC or delivery orders, stock loans, dividends, redemptions, etc. for DTC) on separate PTS functions, (i.e., "FFS" for DTC activity and "NSCC" for NSCC activity). At a predetermined time, DTC and NSCC cease processing valued transactions, and each calculates a separate final settlement obligation for each participant.

Following the determination of final participant settlement obligations for each organization, a participant's credit balance at one clearing corporation will be netted against its debit balance at the other (a process referred to as "cross-endorsement"). Settling banks subsequently "acknowledge" the DTC and/or NSCC settlement obligation(s) on behalf of their participant customers, and then transmit or receive funds separately to or from DTC's account (and NSCC's sub account) at the FRBNY.

(The impact of the consolidated settlement system on DTC and NSCC settling banks is addressed in Important Notice #4631.)

The New Settlement System

In 2001, DTC introduced new PTS "SET" functions. The new SET functions are "modernized" versions of the DTC FFS functions and are available via PTS and the Participant Browser Service (PBS). The SET functions (SETP and SETB) will be modified to become the new DTC/NSCC consolidated settlement function. All existing NSCC settlement activity codes will be added to the SET functions. Additionally, the functions will be updated with DTC and NSCC settlement data throughout the day. Each participant's net DTC and NSCC settlement balance will be separately summarized, and the final NSCC and DTC balances will be netted and/or aggregated to one ultimate DTC/NSCC balance for each participant.

In order to implement the consolidated settlement system and commence parallel reporting, beginning May 12, 2003 until June 2, 2003 access to the PTS SET functions will be blocked. During that time, participants will be required to access the existing PTS FFS system to view all DTC settlement activity.

Beginning June 2, 2003, participants will be able to access the SETP function to view both DTC and NSCC settlement activity, and will be able to view a consolidated netted and/or aggregated DTC/NSCC settlement obligation. (Copies of the new consolidated PTS screens are attached. PBS screens will be distributed prior to the June 2 implementation date.)

Transaction Processing

Both DTC and NSCC process a number of different transactions types submitted via various input mechanisms. The consolidation of the DTC and NSCC settlement systems will have no effect on existing transaction input processes.

-2-

Cross Endorsement

Although participants can view a consolidated DTC/NSCC settlement obligation throughout the day, participants will continue to have separate obligations to/from both organizations. As in the current system, at approximately 3:40 p.m., a participant's credit balance due from one organization will be used to offset its debit balances due to the other organization. The cross endorsement process will change the underlying participant obligation to or from both DTC and NSCC, but will not effect a participant's consolidated DTC/NSCC settlement obligation.

Mutual Fund / Insurance Participants

Mutual Fund and Insurance participants that are NSCC-only participants, generally do not have access to DTC's PTS system. As such, settlement activity is generally distributed to Mutual Fund and Insurance participants via an automated file or via NSCC's P.C. Web Direct facility. These processes will remain unchanged. Mutual Fund participants that currently receive the NSCC Money Settlement Account Fund/SERV file (AutoRoute 02132518) will continue to do so. Likewise, Insurance participants that currently receive the Annuities Settlement file (AutoRoute # 02300709) will also continue to do so. Participant settlement data will also continue to be provided via the P.C. Web Direct facility.

Exempt Participants

Exempt participants are NSCC settling participants that are not required to utilize a designated settlement bank. Instead, exempt participants are responsible for coordinating the settlement of their NSCC settlement obligation through any bank they choose. With the implementation of the consolidated settlement system, exempt participant wire instructions will be changed. Since the banks used by exempt participants are not NSCC settling banks, it is the exempt participant's responsibility to coordinate the change in the wire instructions. The new wire instructions and the date the new instructions will be implemented will be announced in a future Important Notice.

Settlement Cutoffs

DTC and NSCC expect to modify some of the settlement cutoffs at a future date. The following are the changes expected:

Function	Current	New
Final Figures	4:00 PM	3:45 PM
Settling Banks Acknowledgements	4:30 PM	4:15 PM
Debit Payments (Settling Banks)	5:00 PM	4:45 PM

The date these new cutoffs will be effective will be announced in a future Important Notice.

All other input and settlement cutoffs will remain unchanged.

Reporting

As part of the consolidation of the DTC and NSCC settlement systems, the following settlement- related reporting changes will be implemented:

Report Name	Auto route Number	Format	Status	Comments
NSCC Preliminary Settlement Statement	02130061	Print Image	Eliminated	Users should use on-line PTS SET inquiry screens or newly created NSCC Broker file.
NSCC Final Settlement Statement	02130058	Print Image	Eliminated	Users must convert to the DTC/NSCC Participant Settlement Super Statement.
FFS Participant Super Statement	05130660	Print Image	Eliminated	Users must convert to the DTC/NSCC Participant Settlement Super Statement.
DTC/NSCC Participant Settlement Super Statement	02131245	Print Image	New	Displays all DTC and NSCC participant activity for a given day.
Money Settlement File for Mutual Fund Activity (non-Y2K)	02130518	Machine Readable File	Eliminated	Users should convert to the Y2K complaint version of this file (auto route 02132518).
NSCC Debit/Credit File (non-Y2K)	02130065	Machine Readable File	Eliminated	Users should convert to the Y2K complaint version of this file (auto route 02132065).
NSCC Broker File	N/A (Available via MDH only)	Machine Readable File	New	Displays NSCC activity broken-out by individual NSCC activity code. File name MDH NSCC Sett Statement (MDHSCTN).

The new DTC/NSCC Participant Super Statement will contain a consolidated section, a DTC statement, and a NSCC section. DTC-only participants will receive only the DTC section of the report, NSCC-only participants will receive only the NSCC section of the report, and dual Participants will receive a DTC section, an NSCC section, and a consolidated section of the report. Participants that currently receive either the NSCC Final Settlement Statement or the FFS Participant Super Statement will automatically receive the DTC/NSCC Participant Settlement Super Statement. The delivery method of all reports will remain unchanged.

During the parallel reporting period commencing on June 2, the current DTC and NSCC settlement reports will continue to be available. In addition, the new consolidated reports will also be available. At the end of the parallel period (the exact date of which will be announced in a future Notice) those reports and files marked for elimination will no longer be produced.

-4-

Although DTC and NSCC will be producing reports in both the old and new formats, the old report formats will remain the official records until the end of the parallel period. During the parallel period, the new reports are to be used for testing and comparison purposes only.

All DTC and NSCC output reports and files not specifically addressed in this notice will remain unchanged.

Participant Failure To Settle

As mentioned earlier, DTC and NSCC will remain separate legal entities and each participant will continue to have a separate settlement obligation to/from DTC and NSCC. If a participant is unable to satisfy its settlement obligation to either or both organizations, each organization (DTC and NSCC) will invoke its respective Failure-To-Settle/Close-Out procedures for the obligation due from the failing participant. The existing Failure-To-Settle/Close-Out procedures will remain unchanged.

Consolidated Settlement Implementation (Parallel Phase)

To allow participants to become comfortable with the consolidated settlement screen display on the SETP function, DTC and NSCC will introduce the new screens in parallel with the existing settlement functions. During the parallel phase, participants will be able to access the PTS FFSP function to view DTC settlement data, the PTS NSCC function to view NSCC settlement data, and the PTS SETP function to view consolidated settlement activity.

The PTS functions and settlement output are expected to be available in parallel for several months. After that time, the FFSP function and the NSCC Money Settlement function will be disabled and all participant settlement activity will be available via the PTS SETP functions only. At the end of the parallel period, the current NSCC end of day settlement reports will be eliminated and replaced with the Consolidated DTC/NSCC Participant Super Statement.

As mentioned in this Notice, DTC and NSCC will distribute additional information regarding this topic as we move closer to the implementation of the consolidated DTC/NSCC settlement system.

A copy of this Important Notice can be found at DTC's Web site <http://www.dtc.org> or NSCC's Web site <http://www.nsc.com> in the Important Notice section. If you have any questions regarding these modifications, please contact your Relationship Manager, Patricia Ryan (212) 855-8427, Vincent Mc Devitt (212) 855-5694 or the undersigned at (212) 855-8434.

Introduction

Using the current Fed Funds Settlement (FFS) system, accessible through the FFS* and SET* functions via the Participant Terminal System (PTS) and the Settlement application in the Web-based Participant Browser Services (PBS), different types of users can view account balances, transaction details, and general settlement progress. In the new Consolidated Settlement system, some screens have been added and some have been updated to allow participants and settling banks to manage their settlement process for both the depository and the clearing corporation. The SET* online screens have been modified to allow inquiry and updating capabilities for NSCC accounts.

The following sections show the flow of screens for Consolidated Settlement for the PTS functions **SETP** (participant functions) and **SETB** (settling bank functions), followed by samples and brief descriptions of the new and updated screens.

Note: SETP replaces FFSP, and SETB replaces FFSB.

Participant Screens

Consolidated Participant Account Statement

The **new** Consolidated Participant Account Statement screen displays both the DTC and NSCC balances as well as a combined balance on the "Total" line.
